Mission of the Wahkiakum Conservation District

- The mission of the Wahkiakum Conservation District is to protect and improve the natural resources of the District and to guide resource development and use to provide the highest quality of life for present and future citizens.

Natural Resource Priorities

- To coordinate the delivery of, and maintain the District's capacity to provide technical assistance to landowners within the district promoting sound resource management. This includes the ability to provide walk-in/call-in, field visits, and community watershed level technical assistance for planning, designing, and implementing practices that address site specific resource concerns.
 - Local priority, based upon landowner feedback during long range planning outreach, supporting agencies includes all of our local natural resource partners including Cowlitz County Noxious Weed Control Board, WSU Cooperative Extension, WDFW, WSDNR, WSDOE
- Salmon Recovery*:
 - State (Lower Columbia Salmon Recovery and Fish and Wildlife Plan), Regional / Federal (Pacific Coast Salmon Recovery & Endangered Species Act)
 - LCFRB, SRFB, NOAA-NMFS, WDFW, LCREP,
- Water Quality*: predominantly non point source pollution
 - State (WSDOE 303(d) list; Federal (EPA - Clean Water Act & USDA NRCS - State Natural Resource Concerns)
- Flood Damage Mitigation*
 - State & Federal (WSDOE & FEMA - Flood Hazard Mitigation Programs)
- Economic Viability*
- Invasive Weeds*
 - State (WSDA Noxious Weed Program)

* Landowner assistance does not fit neatly into natural resource priorities as listed above. Landowners typically request assistance to resolve their resource concerns which generally encompass most if not all of the priorities. Landowners typically are interested in being good all around stewards of the land under their care.

FY2014 (7/1/13 – 6/30/14) Annual Work Plan Wahkiakum Conservation District

Natural Resource Priority Program Area: Community Watershed Management Program

Goal(s):

Continue to develop and secure funding to maintain the District's capacity to assist watershed communities with planning and implementation on a watershed level.

Assist local watershed communities to address local natural resource issue(s) on a comprehensive basis.

Natural Resource Measurable Result Objective:

Measurable result objectives are somewhat variable amongst watershed communities. typical measurable result objectives include

Improve water quality by implementing practices designed to bring specific parameters to within state standards

Implement short term practices that will address high priority limiting factors for salmon recovery on a reach by reach basis and implement long term practices that will help sustain improvements.

Implement practices designed to address landowner identified site specific resource.

Conduct education / outreach activities community wide and individually to increased awareness of natural resources stewardship.

Assist with community based effort to manage noxious weeds emphasizing those species that spread aggressively via water.

Programmatic Measurable Result Objective: [

Long term objective: Develop and implement plans and designs with 75 percent (spatially) of the community watershed in order to realize a measurable difference in most watershed based resource concerns.

Annual measureable objective:

Assist 2 landowners with implementation, 2 landowners with site planning and design, and 2 landowners with project development/funding in each community watershed.

Funding Source(s): The principal funding sources for this program includes WSCC implementation and Governors Salmon Recovery Office.
